

Raphael Käfers Constellation Project Retrospection

A constant walk on the borderlines between extremes. This could be a way to describe the compositions of the young Austrian guitarist Raphael Käfer in a nutshell.

The debut album being released within the artist name „Raphael Käfer's Constellation Project“ presents five original compositions and an arrangement of the well known Jazz standard "How deep is the Ocean" pursuing the goal to express the experiences of the past decade. Within the album title „Retrospection“ the artist nails down the plan to reflect the past to open up for the here & now and the future. Musically speaking this shows off in a huge variety of the compositions' mood, tempo and style which all rely on contemporary jazz.

Due to the lineup, representing some of the best Austrian jazz musicians the compositions appear powerful and energetic. The final musical outcome puts in a nutshell what's over and what could be in the future...
